Identifying the SAP Fiori User Experience

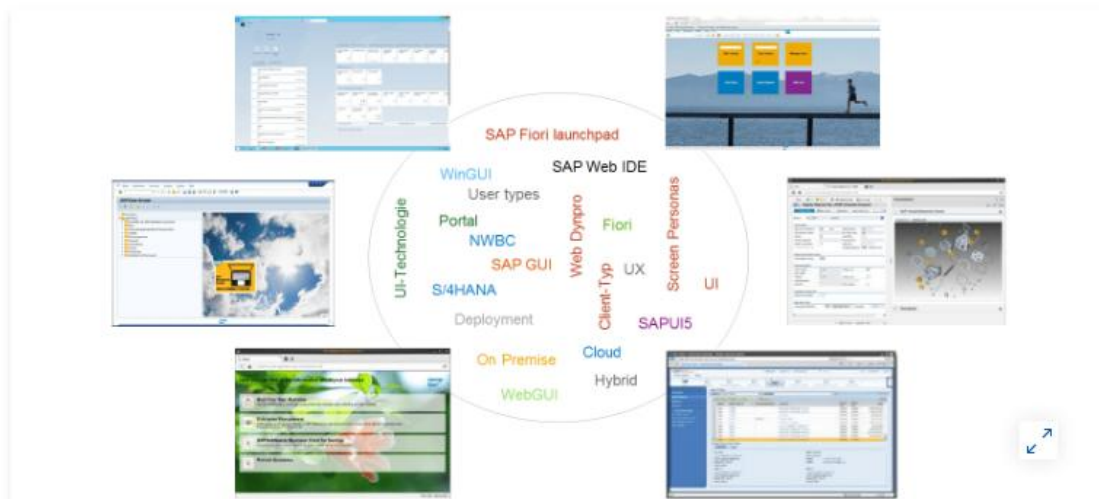

Objective

After completing this lesson, you will be able to use the SAP Fiori launchpad

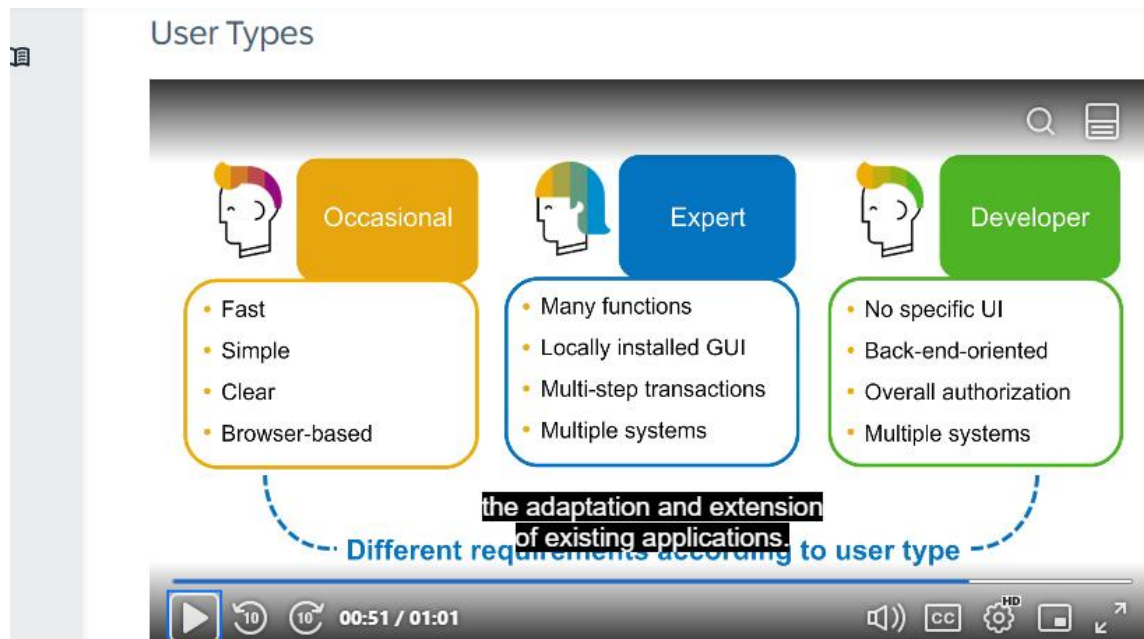

SAP Fiori User Experience

Concepts and Influencing Factors

IT and the use of electronic devices are no longer reserved just for experts, and have spread throughout all social groups. High-performance hardware stands against a wide variety of software products with different

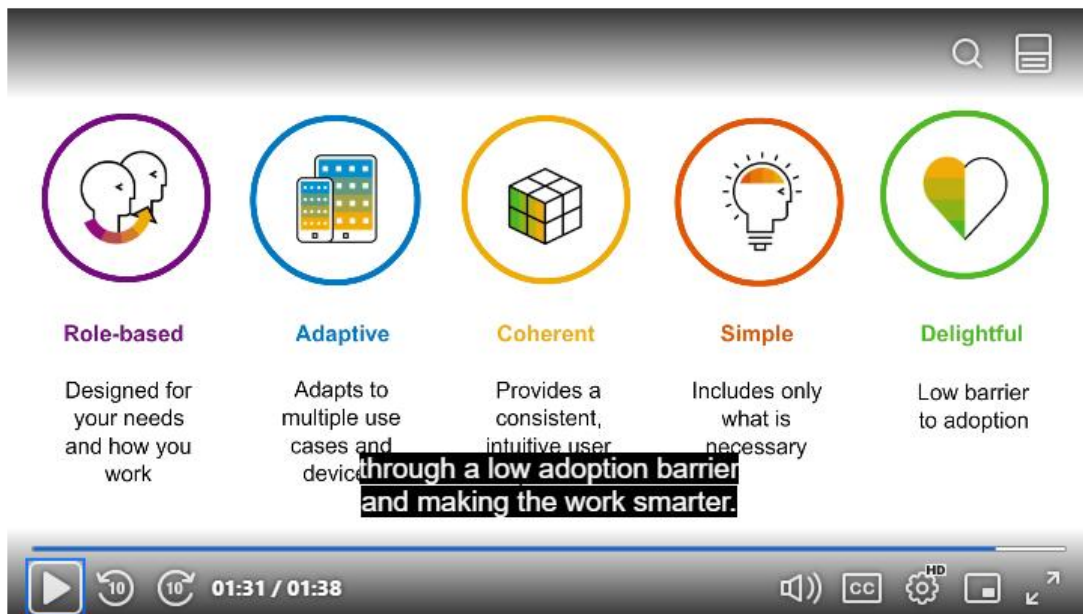

SAP Fiori

SAP Fiori offers a unified user experience for various clients. Users must have a consistent, coherent, simple, intuitive, and delightful user experience on all devices to be able to work better and more efficiently.

SAP Fiori

SAP Fiori offers a unified user experience for various clients. Users must have a consistent, coherent, simple, intuitive, and delightful user experience on all devices to be able to work better and more efficiently.

The image shows a video player interface displaying the SAP Fiori User Experience Principles. The video player has a progress bar at 01:31 / 01:38. The principles are presented as five icons in a row, each with a corresponding title and description. A text overlay is present over the 'Adaptive' and 'Coherent' sections.

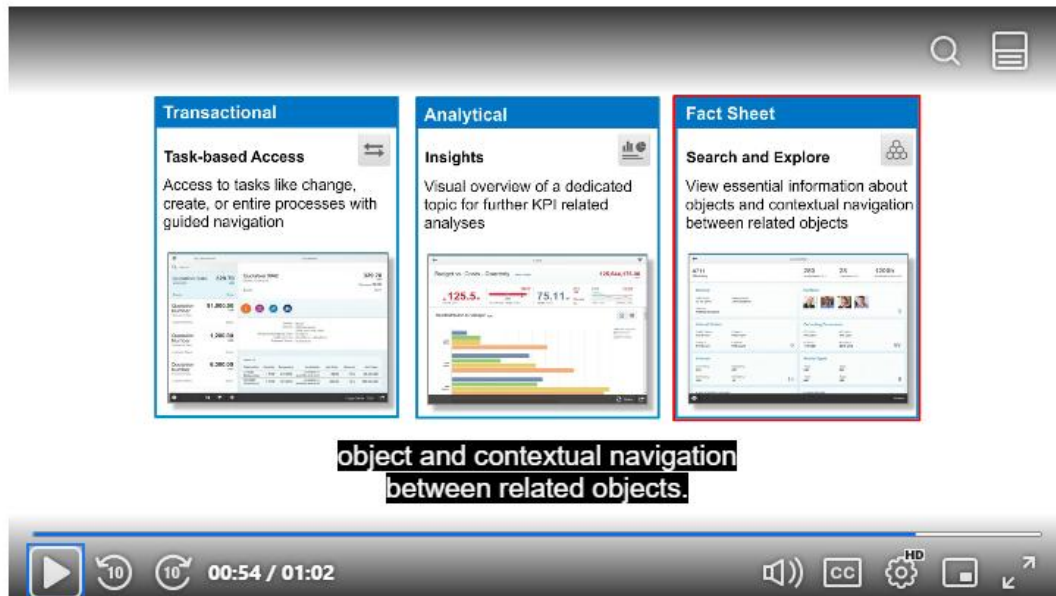

Role-based	Adaptive	Coherent	Simple	Delightful
Designed for your needs and how you work	Adapts to multiple use cases and devices	Provides a consistent, intuitive user experience	Includes only what is necessary	Low barrier to adoption

through a low adoption barrier and making the work smarter.

Application Types

Application Types

The screenshot displays the SAP Fiori Launchpad interface with three application tiles:

- Transactional**: Task-based Access. Access to tasks like change, create, or entire processes with guided navigation. The tile shows a screenshot of a transactional interface with a table and buttons.
- Analytical**: Insights. Visual overview of a dedicated topic for further KPI related analyses. The tile shows a screenshot of an analytical dashboard with charts and KPIs.
- Fact Sheet**: Search and Explore. View essential information about objects and contextual navigation between related objects. The tile shows a screenshot of a fact sheet interface with a table and navigation links.
