

good i would like you create a full course on SAP MM module with screenshots illustrating each actions, do not extravagante just be result oriented.

Got it — I'll keep this practical, structured, and action-oriented, like a real training manual. One constraint: I can't embed real SAP screenshots, but I'll simulate them clearly ("what you see on screen") so you can follow step-by-step in SAP.

SAP MM (Materials Management) — Full Practical Course

Objective

By the end, you will be able to:

Create material master data

Manage vendors

Execute purchasing cycle

Handle goods receipt & invoice

Understand stock & valuation

MODULE 1 — SAP MM OVERVIEW

What is SAP MM?

SAP MM handles:

Procurement

Inventory management

Vendor management

Key Transactions (you MUST know)

Action	T-Code
Create Material	MM01
Display Material	MM03
Create Vendor	XK01
Create Purchase Requisition	ME51N
Create Purchase Order	ME21N
Goods Receipt	MIGO

MODULE 2 — MATERIAL MASTER (MM01)

Goal

Create a material used in procurement

Steps

1. Run Transaction

MM01

2. Initial Screen

You will see:

Material: (leave blank for auto-number)

Industry Sector: e.g. M (Mechanical)

Material Type: e.g. ROH (Raw Material)

Click Select Views

3. Select Views

Choose:

Basic Data 1

Purchasing

Accounting 1

MRP 1

Press Enter

4. Organizational Levels

Fill:

Plant: 1000

Storage Location: 0001

5. Fill Data

Basic Data 1

Material Description: Laptop HP

Base Unit: PC

Purchasing

Purchasing Group: 001

Accounting

Valuation Class: 3000

Price Control: V (moving average)

✓ Result

Material is created

MODULE 3 — VENDOR MASTER (XK01)

Steps

1. Run:

XK01

2. Fill:

Vendor Account Group: 0001

Company Code: 1000

Purchasing Org: 1000

3. Enter Vendor Info

Name: ABC Supplies

Country: NL

City: Amsterdam

4. Payment Data

Payment Terms: 0001

✓ Result

Vendor created

MODULE 4 — PURCHASE REQUISITION (ME51N)

Internal request for purchase

Steps

Run:

ME51N

Fill:

Document Type: NB

Material: (your material)

Quantity: 10

Plant: 1000

“Screen view”

You will see a table:

Material	Qty	Plant	Delivery Date
----------	-----	-------	---------------

-----	----	-----	-----
-------	------	-------	-------

Laptop	10	1000	20.04.2026
--------	----	------	------------

Save

MODULE 5 — PURCHASE ORDER (ME21N)

Convert PR into PO

Steps

Run:

ME21N

1. Header

Vendor: your vendor
Purchasing Org: 1000

2. Item Overview

Material

Quantity

Net Price

“Screen view”

Vendor: ABC Supplies

Material	Qty	Price	Plant
-----	-----	-----	-----
Laptop	10	800	1000

Save → PO Number generated

MODULE 6 — GOODS RECEIPT (MIGO)

Receive goods into stock

Steps

Run:

MIGO

Select:

Transaction: Goods Receipt

Reference: Purchase Order

Enter:

PO Number

“Screen view”

Movement Type: 101

Material	Qty	Storage Location
-----	-----	-----
Laptop	10	0001

Click:

✓ Check

✓ Post

✓ Result

Stock updated

MODULE 7 — INVOICE VERIFICATION (MIRO)

Record vendor invoice
Steps
Run:
MIRO

Fill:
Vendor
Invoice Date
Amount

Reference PO

“Screen view”
Invoice Amount: 8000 EUR
PO: 4500001234

Post

✓ Result
Accounting document created

MODULE 8 — STOCK OVERVIEW
Run:
MMBE

“Screen view”
Material: Laptop

Plant 1000
Storage Location 0001

Unrestricted Stock: 10

FULL PROCESS FLOW
MM01 → Create Material
XK01 → Create Vendor
ME51N → Purchase Requisition
ME21N → Purchase Order
MIGO → Goods Receipt
MIRO → Invoice
MMBE → Stock Check

⚡ COMMON MISTAKES (IMPORTANT)

- ✗ Wrong plant → data inconsistency
- ✗ Missing accounting view → errors in PO
- ✗ Not posting MIGO → no stock
- ✗ Invoice before GR → blocked invoice

REAL-WORLD TIPS

Always verify organizational levels
Use F4 help (search) everywhere
Check document flow in PO
Use ME23N to audit everything

NEXT LEVEL (if you want)

I can build for you:

- ✓ Full PDF training manual
- ✓ Real SAP case study (company scenario)
- ✓ Exercises + corrections
- ✓ PowerPoint training slides
- ✓ Advanced topics (pricing, release strategy, MRP)

If you want screenshots-like visuals closer to SAP (very realistic), tell me:

“simulate real SAP screens”

Or if you want:

“advanced SAP MM (consultant level)”

simulate real SAP screens

Perfect — I’ll simulate real SAP GUI screens as closely as possible so you feel like you’re inside the system.

No fluff, just what you actually see and where to click.

SAP MM — REALISTIC SCREEN SIMULATION (STEP-BY-STEP)

1. MATERIAL CREATION — MM01

Initial SAP Screen

Transaction: MM01	
Material:	[]
Industry Sector:	[M ▼]
Material Type:	[ROH ▼]
[Select Views] [Cancel]	

Action:

Leave Material empty

Click Select Views

Select Views Popup

Select View(s)

Storage Location	Unrestricted	Quality	Block
0001	10	0	0

FULL SAP FLOW (REAL VIEW)

[MM01] → Material Created

↓

[XK01] → Vendor Created

↓

[ME51N] → Purchase Requisition

↓

[ME21N] → Purchase Order

↓

[MIGO] → Goods Receipt

↓

[MIRO] → Invoice

↓

[MMBE] → Stock Visible

⚡ PRO USER INSIGHT (IMPORTANT)

Inside SAP:

Green ✓ = OK

Yellow ⚠ = Warning

Red ⚡ = Error

Always check status bar (bottom of SAP screen)
That's where SAP tells you what's wrong.

If you want next level

I can simulate:

Return to vendor (122 movement)

Stock transfer (311 movement)

Pricing conditions (MEK1)

Release strategy (approval workflow)

MRP run (MD01)

Just tell me:

“advanced scenarios”

advanced SAP MM (consultant level)
