

Creating a Supplier Invoice

Explanation	Screenshot
 In this demonstration, we will show you how to create a supplier invoice with reference to a purchase order using the <i>Create Supplier Invoice</i> app. The following data are used: • Company Code: 1010 • Gross Invoice Amount: EUR 5720 • Reference: IV-240304 • Purchase Order: 4500000066 <u>Prerequisites for the following demonstration</u> A purchase order for which a goods receipt has been posted but not yet settled. In our example, this is the purchase order 4500000066.	 The screenshot shows the SAP Fiori app catalog interface. The top navigation bar includes the SAP logo, a 'Home' dropdown, and a search bar. Below the navigation bar, there are several app tiles. The 'Create Supplier Invoice' app is highlighted with a blue border. Other visible tiles include 'SAP Fiori App Library' and 'SAP Education'. The background is a light gray color.

Explanation	Screenshot
 To open the <i>Create Supplier Invoice</i> app, first you have to navigate to the <i>Supplier Invoice Processing</i> tile group. 1. To view additional tile groups, choose the <i>arrow</i>.	
2. Choose <i>Supplier Invoice Processing</i>.	
3. To open the app, select the <i>Create Supplier Invoice</i> tile.	

Explanation	Screenshot
4. In the <i>Company Code</i> field, enter 1010 and press Enter.	
 Information regarding the <i>Data Will Be Lost</i> message: The company code is a key control element in Financial Accounting. Therefore, changing the company code while entering an invoice results in the loss of the values previously entered. In this example, this is not a problem because no other data has been entered yet. 5. To confirm the message, choose OK.	

Explanation	Screenshot
6. In the <i>Gross Invoice Amount</i> field, enter 5720 and press Enter.	
i In the <i>Basic Data</i>, also fill in the following fields: • <i>Invoice Date</i>: Enter the invoice date of the supplier invoice. Here, the date is March 3, 2024. • <i>Reference</i>: Enter the supplier's invoice number. Here, the number is IV-240304. • <i>Posting Date</i>: This date is usually prefilled by the system with the current date.	

Explanation	Screenshot
Once the basic data has been entered, the reference to the purchase order must be specified. Of course, you can enter the purchase order number directly. However, you can also enter the delivery note number of a goods receipt for the purchase order, for example. To do this, you must select <i>Delivery Note</i> instead of <i>Purchase Order/Scheduling Agreement</i> in the <i>Reference Document Category</i> field.	
In this demonstration, we will enter the purchase order number and therefore do not need to change the selection in the <i>Reference Document Category</i> field.	

Explanation	Screenshot
7. In the <i>Purchase Order/Scheduling Agreement</i> field, enter 4500000066 and press Enter.	
Before the invoice is posted, we want to analyze the PO history for the purchase order item. 8. To scroll to the items copied from the purchase order, choose <i>Purchasing Document Reference</i>.	
9. To view the history of the purchase order item, choose <i>View</i> .	

Explanation	Screenshot
i You can find the following information for the item in the <i>Purchase Order History</i>: <i>Quantity Ordered</i> and <i>Quantity Received</i>: The entire ordered quantity of 100 pieces has already been delivered. <i>Quantity Invoiced, Amount Invoiced</i> and <i>Open Quantity</i>: No invoice has yet been entered for the purchase order item, so the quantity to be invoiced (open quantity) is 100 pieces. <i>Net Price</i> and <i>Net PO Value</i>: The material was ordered at a net price of EUR 52 and the expected invoice amount of the item is EUR 5200. Explanation	Screenshot
i Which taxes are to be paid and how they are to be posted in the system depends on the tax regulations defined by law in the country of the company concerned. The postings made are controlled by the tax code. The <i>Tax Code</i> for this item is 11, which means that the <i>Tax Rate</i> is 10%. 10. To display the tax amount, choose <i>Tax</i>.	
i In the <i>Tax</i> section, the automatically calculated <i>Tax Amount</i> of EUR 520 is displayed. When entering the invoice, you must check whether the tax code in the invoice item and the values in the <i>Tax</i> section match the supplier invoice. You may need to change these entries according to the supplier invoice. In our example, all	

Explanation	Screenshot
details are correct.	
11. To complete the entry of the invoice, choose <i>Post</i> .	
Once you have posted your invoice you will receive a message indicating that an invoice document has been created. We want to display the document directly after the posting to check the PO history update. 12. To display the invoice document, choose the <i>Supplier invoice</i> number.	
13. To scroll to the <i>Invoice Items</i> section, choose <i>Purchasing Document References</i> .	

Explanation	Screenshot															
14. To open the purchase order history for the item, choose <i>View</i>.	 The screenshot shows the SAP Supplier Invoice interface. The 'Invoice Items' table has a 'View' button highlighted in the 'History' column for item 1. A yellow circle with the number 14 is placed over the 'View' button.															
The information for <i>Quantity Invoiced</i>, <i>Amount Invoiced</i> and <i>Open Quantity</i> were updated. The full quantity delivered for the item has been invoiced at an amount of EUR 5200. Therefore, the <i>Quantity Invoiced</i> is 100 PC and the <i>Open Quantity</i> is zero.	 The screenshot shows the SAP Supplier Invoice interface with the 'Purchase Order History' dialog box open. The dialog box displays the following information: <table><tr><th>Quantity Ordered:</th><th>Amount Invoiced:</th><th>Net Price:</th></tr><tr><td>100 PC</td><td>5,200.00 EUR</td><td>52.00 EUR</td></tr><tr><th>Quantity Received:</th><th>Open Quantity:</th><th>Net PO Value:</th></tr><tr><td>100 PC</td><td>0 PC</td><td>5,200.00 EUR</td></tr><tr><th>Quantity Invoiced:</th><td>100 PC</td><td></td></tr></table> The 'View' button in the 'Invoice Items' table is also highlighted.	Quantity Ordered:	Amount Invoiced:	Net Price:	100 PC	5,200.00 EUR	52.00 EUR	Quantity Received:	Open Quantity:	Net PO Value:	100 PC	0 PC	5,200.00 EUR	Quantity Invoiced:	100 PC	
Quantity Ordered:	Amount Invoiced:	Net Price:														
100 PC	5,200.00 EUR	52.00 EUR														
Quantity Received:	Open Quantity:	Net PO Value:														
100 PC	0 PC	5,200.00 EUR														
Quantity Invoiced:	100 PC															
15. To leave the app, choose <i>Navigate to Home</i>.	 The screenshot shows the SAP Supplier Invoice interface. The 'Navigate to Home' button is highlighted in the top right corner. A yellow circle with the number 15 is placed over the button.															

Explanation	Screenshot
 As the last step of this demonstration, we want to check the process flow of the purchase order 4500000066. 16. Choose <i>Purchase Order Processing</i>.	
17. To open the app, select the <i>Manage Purchase Orders</i> tile.	
18. In the <i>Purchase Order</i> field, enter 4600000066.	

Explanation	Screenshot
19. To start the selection, choose Go.	
20. To display the purchase order, choose the arrow.	
21. To scroll to the Items section, choose Items.	

Explanation	Screenshot
22. To view the item details, choose the arrow.	
To view all available tabs, choose the down arrow on the right. This opens a list from which you can select the <i>Process Flow</i> tab. 23. Select <i>Process Flow</i>.	
On the process flow screen of the purchase order item, you can see all the documents that belong to this purchase order item. In our example, this is the material document for the goods receipt and the invoice document for the supplier invoice.	

Explanation	Screenshot
24. To leave the app, choose <i>Navigate to Home</i>.	
 You have now seen how to enter a supplier invoice with reference to a purchase order and how this updates the history of a purchase order item. This concludes the demonstration.
