

Purchasing a Material for Consumption

Explanation	Screenshot
 In this demonstration, we will show you how to order a material directly for a project using the <i>Manage Purchase Orders</i> app. The following data are used: • Supplier: T-S52A99 • Material: A500-99 • Quantity: 10 PC • Project data: WBS Element F-10099.2 • Project Recipient: Peter Projec	
 To open the <i>Manage Purchase Orders</i> app, first you have to navigate to the <i>Purchase Order Processing</i> tile group. 1. Choose <i>Purchase Order Processing</i>.	

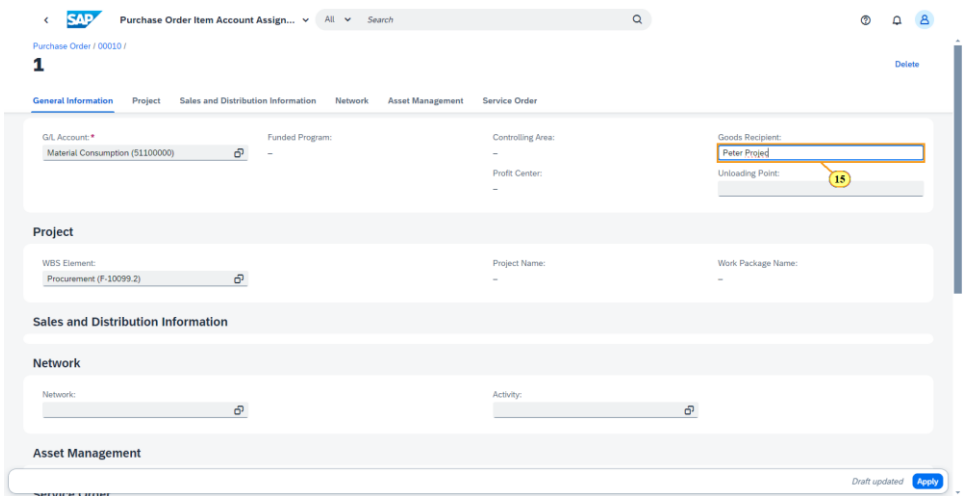

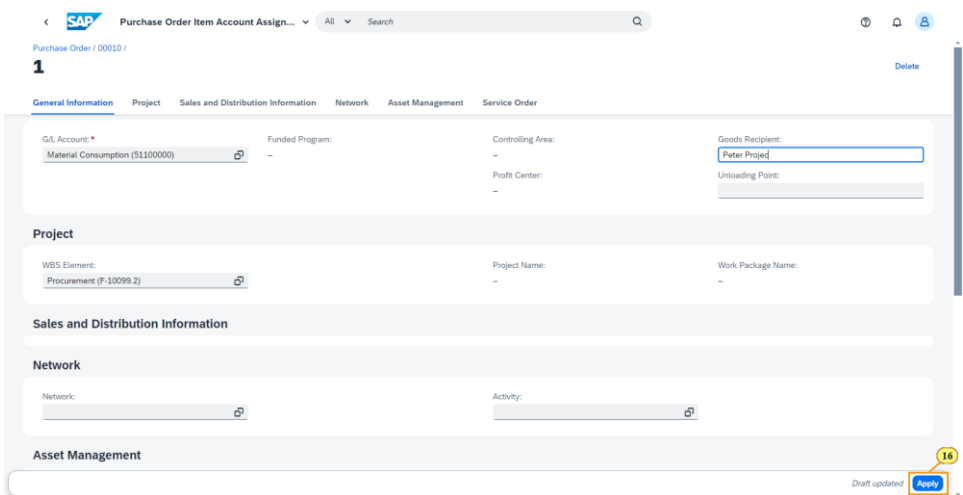

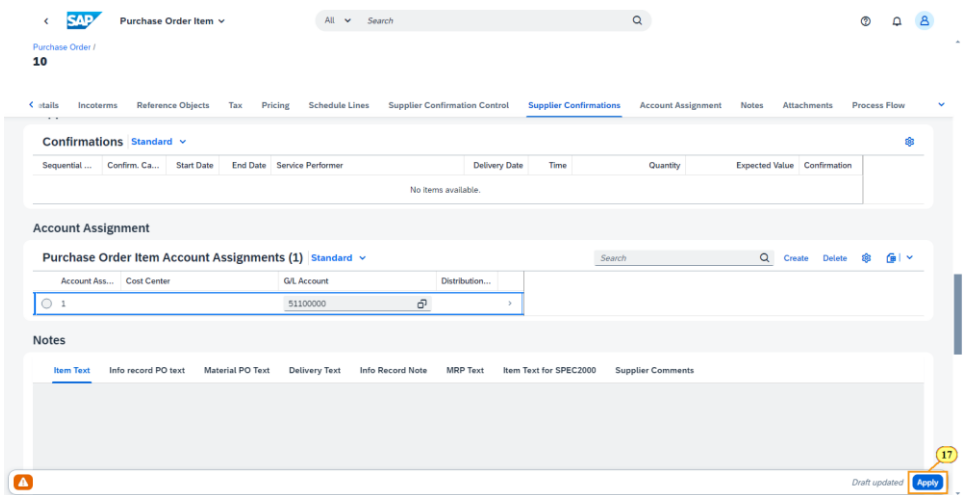

Explanation	Screenshot
2. To open the app, select the <i>Manage Purchase Orders</i> tile.	
 To create a new purchase order, in the <i>Purchase Orders</i> section, choose <i>Create</i>. 3. Choose <i>Create</i>.	
4. In the <i>Supplier</i> field, enter T-S52A99 and press Enter.	

Explanation	Screenshot
5. To create a new PO item, in the <i>Items</i> section, choose <i>Create</i> .	
6. In the <i>Material</i> field, enter A500-99 and press Enter.	
 Next, we want to enter the quantity, the account assignment category, and the account assignment object for the item. To do this, we open the item detail view. 7. To open the item details, choose the arrow.	

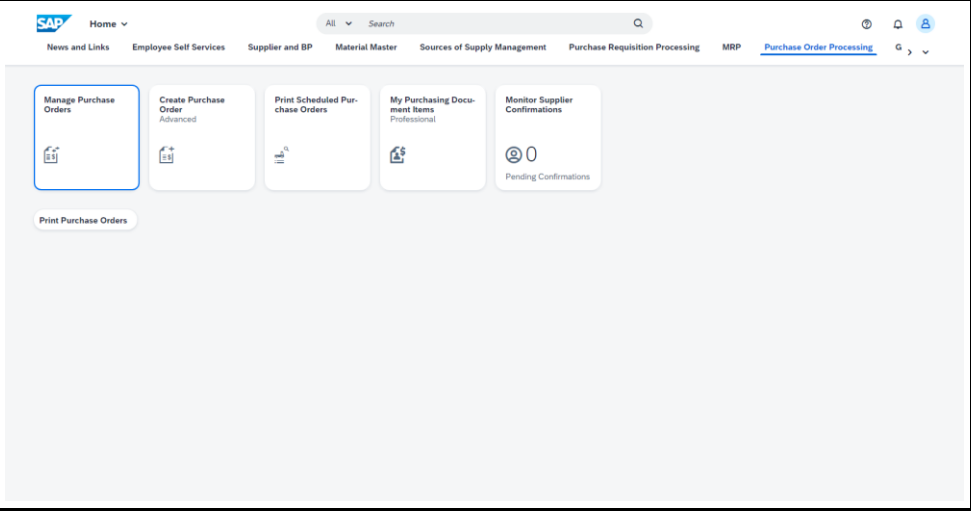

Explanation	Screenshot
8. In the <i>Order Quantity</i> field, enter 10 and press Enter.	
9. To select an <i>Account Assignment Category</i>, open the list.	
10. Select <i>Project (P)</i>.	

Explanation	Screenshot
 Once we have selected an account assignment category, a specific account assignment object must be specified for the item. In this example, the material is required for a special task in a project. The assignment is made using the corresponding work breakdown structure element (WBS element) F-10099.2. The recipient of the material is employee Peter Projec. In the next step, we will enter these information in the account assignment data for the item. 11. To view additional tabs, choose the arrow.	

Explanation	Screenshot
12. Choose <i>Account Assignment</i> .	
13. To display more account assignment details for the PO item, choose the arrow.	
14. In the <i>WBS Element</i> field, enter F-10099.2 and press Enter.	

Explanation	Screenshot
15. In the <i>Goods Recipient</i> field, enter Peter Projec and press Enter.	
16. To adopt the specifications for the account assignment, choose <i>Apply</i>.	
17. To adopt all entries for the PO item, choose <i>Apply</i> again.	

Explanation	Screenshot
18. To save the PO, choose <i>Order</i> .	
 You have now seen how to create a purchase order for consumption. <u>Note:</u> The material ordered is a material with a material master record, which is usually ordered for stock. However, as you have seen, you can also procure such a material directly for consumption. This concludes the demonstration.	

Explanation	Screenshot
	 The screenshot shows the SAP 'Purchase Order Processing' dashboard. At the top, there is a navigation bar with the SAP logo, a 'Home' dropdown, a search bar, and several menu items: 'News and Links', 'Employee Self Services', 'Supplier and BP', 'Material Master', 'Sources of Supply Management', 'Purchase Requisition Processing', 'MRP', and 'Purchase Order Processing' (which is highlighted). Below the navigation bar, there are five main action tiles: 'Manage Purchase Orders' (with a blue border and a calendar icon), 'Create Purchase Order Advanced' (with a plus icon), 'Print Scheduled Purchase Orders' (with a printer icon), 'My Purchasing Document Items Professional' (with a document icon), and 'Monitor Supplier Confirmations' (with a person icon and 'Pending Confirmations' text). A 'Print Purchase Orders' button is located below the first tile.
