

Creating a Simple Purchase Order

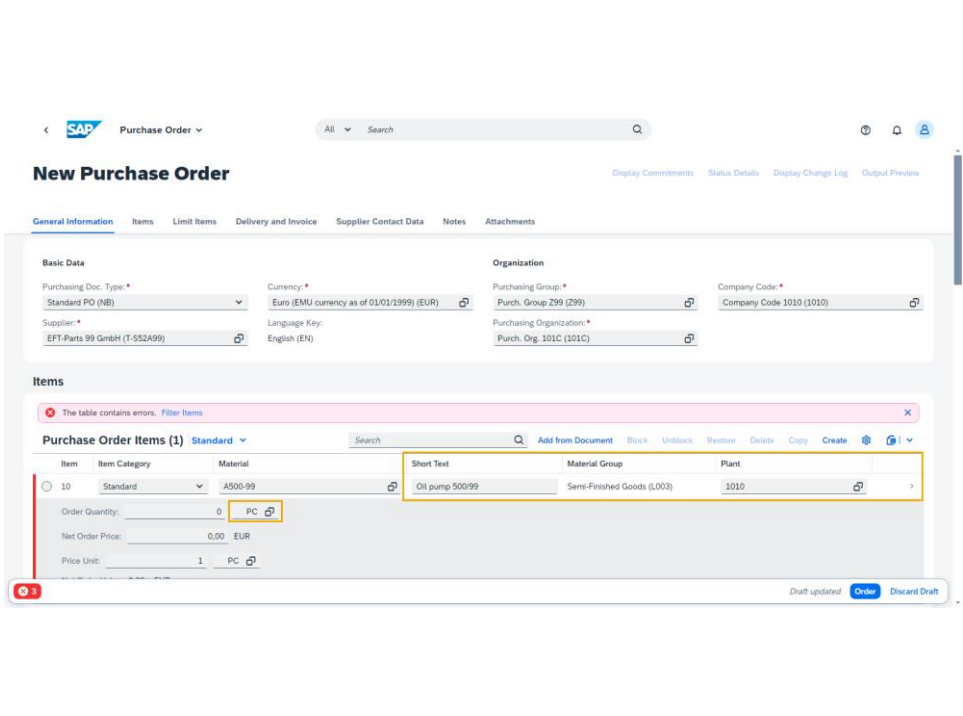

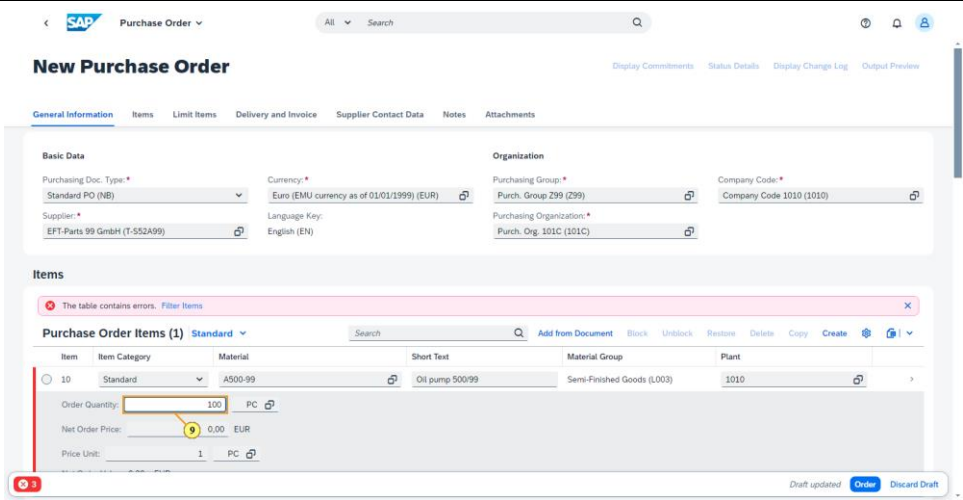

Explanation	Screenshot
 In this demonstration we will show you, how a simple purchase order for stock is created using the <i>Manage Purchase Orders</i> app. The following data are used: • Supplier: T-S52A99 (EFT Parts) • Material: A500-99 (Oil pump) The oil pumps are to be delivered to the plant in Hamburg. This plant is mapped in the system with the plant number 1010.	
 To start the <i>Manage Purchase Orders</i> app, first you have to navigate to the <i>Purchase Order Processing</i> tile group. 1. Choose <i>Purchase Order Processing</i>.	

Explanation	Screenshot
2. To open the app, select the <i>Manage Purchase Orders</i> tile.	
 You use the <i>Manage Purchase Orders</i> app to create a new purchase order.	
 Using the filter area in this app, you can also select existing purchase orders to display or change them, for example.	

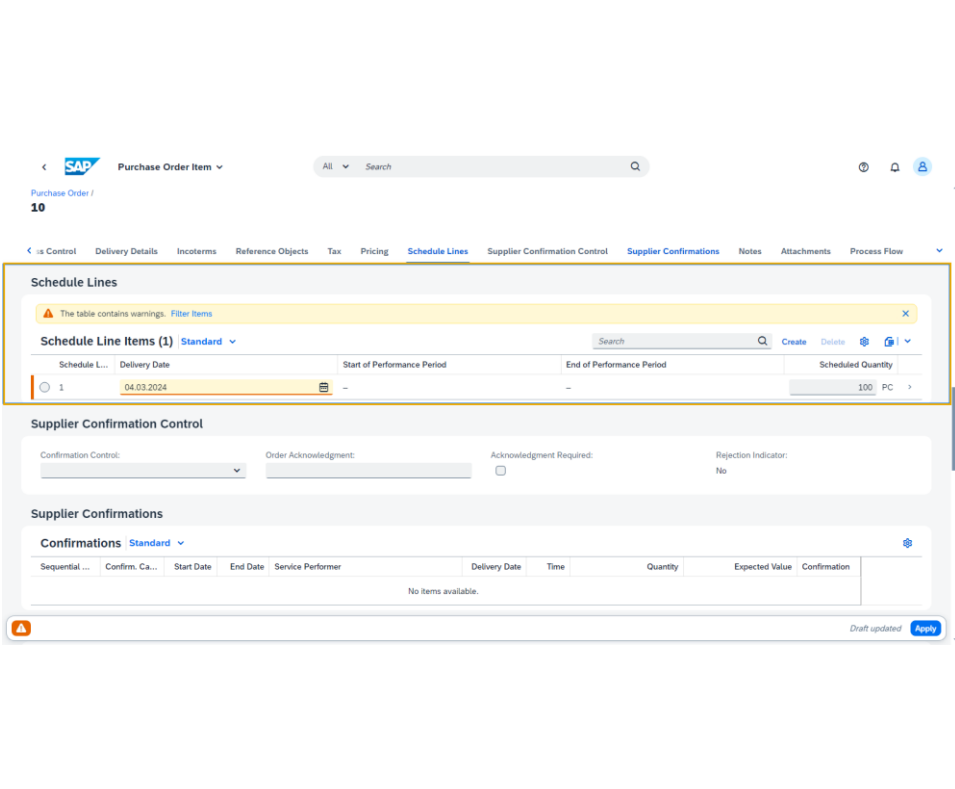

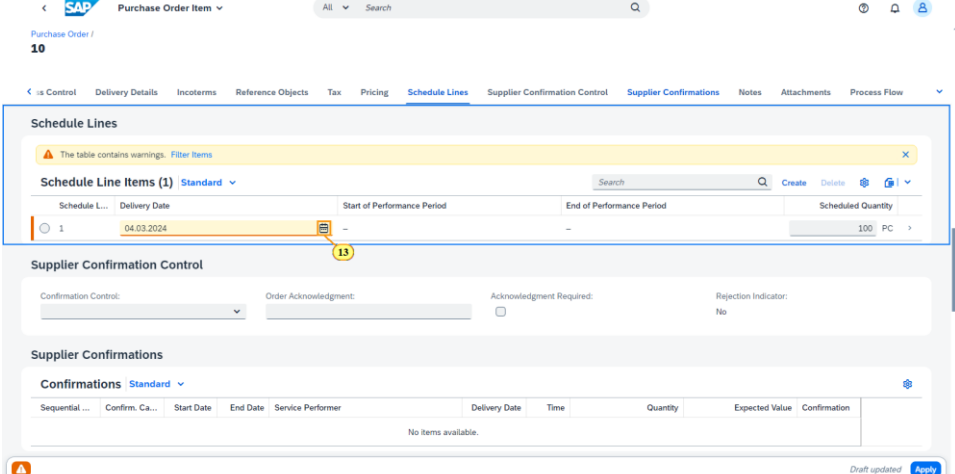

Explanation	Screenshot
3. To create a new purchase order, choose <i>Create</i> .	
4. In the <i>Supplier</i> field, enter T-S52A99 .	
 A list of suggestions is displayed from which you can select your supplier. In this example, the system shows that the supplier with the number T-S52A99 only exists for the <i>Purchasing Organization 101C</i>. 5. Select the line with <i>Supplier T-S52A99</i> and <i>Purch.</i>	

Explanation	Screenshot
Organization 101C.	
 After selecting your supplier, you will notice that mandatory fields such as <i>Purchasing Organization</i>, <i>Currency</i>, <i>Purchasing Group</i>, <i>Company Code</i> and <i>Language</i> have been filled in automatically. These values have been copied from the supplier master record. If, for example, the <i>Purchasing Group</i> is not proposed from the supplier master record, it has to be entered manually.	
 Take care to ensure you are creating a purchase order item under the <i>Items</i> section and not under the <i>Limit Items</i> section 6. To begin creating a new item, choose <i>Create</i>.	

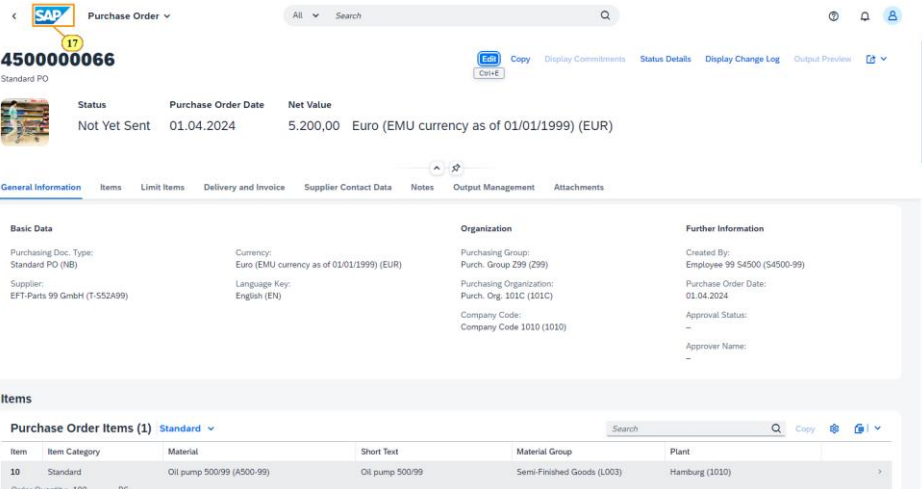

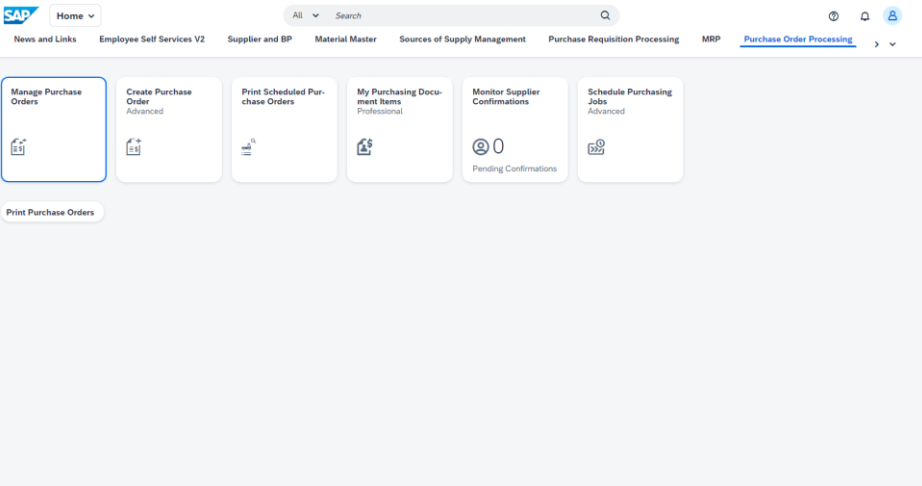

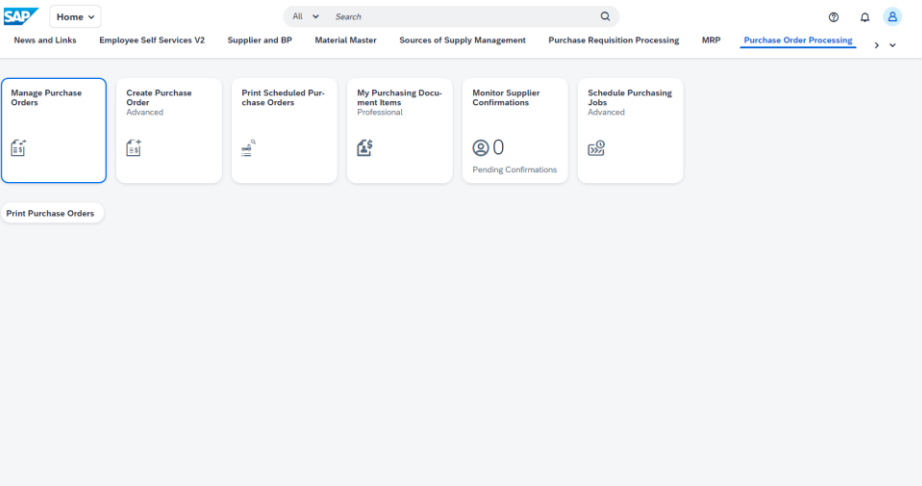

Explanation	Screenshot
7. In the <i>Material</i> field, enter A500-99.	
 A proposal list of materials is displayed from which you can select your material. In this example, the system shows that the material with the number A500-99 is maintained only for <i>Plant 1010</i>. Remember, the material is to be purchased for this plant 1010 (Hamburg). 8. Select the line with <i>Material A500-99</i> and <i>Plant 1010</i>.	

Explanation	Screenshot
 After selecting the material, you will notice that some fields such as <i>Short Text</i>, <i>Material Group</i> and <i>Plant</i> have been filled in automatically. These values have been copied from the material master record. The order unit PC has also been copied from the material master record.	
9. In the <i>Order Quantity</i> field, enter 100 and press Enter.	

Explanation	Screenshot
10. In the <i>Net Order Price</i> field, enter 52,00 and press Enter.	
 To display or enter more information for the item, open the detail data for the item. In this example, the delivery date for the material needs to be changed. 11. To open the item details, choose the arrow.	
12. To change the delivery date for the item, choose <i>Schedule Lines</i> .	

Explanation	Screenshot
As you can see, you can change the delivery date in the <i>Schedule Lines</i> section. However, if necessary, you can also split the order quantity between different delivery dates in this area by creating additional <i>Schedule Line Items</i>. In this example, the delivery date is to be changed to March 13, 2024.	 The screenshot shows the SAP Purchase Order Item 10 interface. The 'Schedule Lines' section is highlighted, showing a table with one item. The 'Delivery Date' field is set to 04.03.2024. The 'Supplier Confirmation Control' and 'Supplier Confirmations' sections are also visible.
In the <i>Delivery Date</i> field, you can enter a value manually or use the date picker instead. 13. Open the date picker  and select the date.	 The screenshot shows the same SAP Purchase Order Item 10 interface. The 'Delivery Date' field is highlighted, and a date picker icon is visible next to it. The date 13 is shown in a yellow box, indicating the date to be selected.

Explanation	Screenshot
14. Select March 13th .	
After you have entered or changed all necessary information for the item, you have to apply these changes to the purchase order item. 15. To confirm the changes, choose <i>Apply</i> .	
16. To finalize the creation of the purchase order, choose <i>Order</i> .	

Explanation	Screenshot
 At the top of the screen you can see that a purchase order has been created with the number 4500000066. 17. To leave the app, choose <i>Navigate to Home</i>.	 The screenshot shows the SAP Purchase Order interface for document 4500000066. At the top, the status is 'Not Yet Sent', the purchase order date is '01.04.2024', and the net value is '5.200,00 Euro (EMU currency as of 01/01/1999) (EUR)'. Below this, there are tabs for 'General Information', 'Items', 'Limit Items', 'Delivery and Invoice', 'Supplier Contact Data', 'Notes', 'Output Management', and 'Attachments'. The 'General Information' tab is active, showing details like 'Purchasing Doc. Type: Standard PO (NB)', 'Supplier: EFT-Parts 99 GmbH (T-552A99)', 'Currency: Euro (EMU currency as of 01/01/1999) (EUR)', 'Language Key: English (EN)', 'Purchasing Group: Purch. Group Z99 (Z99)', 'Purch. Org: 101C (101C)', 'Company Code: Company Code 1010 (1010)', 'Created By: Employee 99 S4500 (S4500-99)', 'Purchase Order Date: 01.04.2024', 'Approval Status: -', and 'Approver Name: -'. The 'Items' section below shows a table with one item: 'Oil pump 500/99 (A500-99)' with a quantity of 100 and plant 'Hamburg (1010)'.
 You have now seen how to use the <i>Manage Purchase Orders</i> app to create a purchase order for stock material. This concludes the demonstration.	 The screenshot shows the SAP Home screen with the 'Purchase Order Processing' app highlighted in the top navigation bar. The main area displays several tiles: 'Manage Purchase Orders' (highlighted with a blue border), 'Create Purchase Order Advanced', 'Print Scheduled Purchase Orders', 'My Purchasing Document Items Professional', 'Monitor Supplier Confirmations' (showing 'Pending Confirmations'), and 'Schedule Purchasing Jobs Advanced'. A 'Print Purchase Orders' button is located at the bottom left of the main area.
	 This is a duplicate of the previous screenshot, showing the SAP Home screen with the 'Purchase Order Processing' app highlighted in the top navigation bar. The main area displays several tiles: 'Manage Purchase Orders' (highlighted with a blue border), 'Create Purchase Order Advanced', 'Print Scheduled Purchase Orders', 'My Purchasing Document Items Professional', 'Monitor Supplier Confirmations' (showing 'Pending Confirmations'), and 'Schedule Purchasing Jobs Advanced'. A 'Print Purchase Orders' button is located at the bottom left of the main area.
